# 11<sup>th</sup> International Conference on Renewable Electrical Power Sources

# PROCEEDINGS

Editor Dr Milica Vlahović

Belgrade, November 02-03, 2023

# PROCEEDINGS

---

## 11th International Conference on Renewable Electrical Power Sources

2023

**PROCEEDINGS**  
**11th International Conference**  
**on Renewable Electrical Power Sources**

Chamber of Commerce and Industry of Serbia,  
Belgrade, November 2 and 3, 2023

**Publisher**

Union of Mechanical and  
Electrotechnical Engineers and  
Technicians of Serbia (SMEITS)  
Society for Renewable Electrical  
Power Sources  
Kneza Miloša str. 7a/II,  
11000 Beograd

**President to the Society**  
**for Renewable Electrical**  
**Power Sources**  
**within the SMEITS**

Prof. dr Zoran Lazarević

**Editor**

Dr Milica Vlahović

Tiraž  
50 primeraka

CD umnožava  
MT-KOMEX doo, Beograd

**ISBN**  
978-86-85535-16-1

CIP - Каталогизacija u publikaciji - Narodna biblioteka Srbije, Beograd

MEĐUNARODNA konferencija o obnovljivim izvorima električne energije (11 ; 2023 ; Beograd)

Zbornik radova pisanih za 11. Međunarodnu konferenciju o obnovljivim izvorima električne energije [Elektronski izvor]: [Beograd, 2. i 3. novembar 2023.] / [urednik Milica Vlahović] = Proceedings / 11th International Conference on Renewable Electrical Power Sources : [Belgrade, October 2 and 3, 2023] ; [editor Milica Vlahović]. - Beograd : Savez mašinskih i elektrotehničkih inženjera i tehničara Srbije SMEITS, Društvo za obnovljive izvore električne energije = Union of Mechanical and Electrotechnical Engineers and Technicians of Serbia (SMEITS), Society for Renewable Electrical Power Sources, 2023.

Sistemska zahtevi: Nisu navedeni. - Nasl. sa naslovne strane dokumenta. - Tiraž 50. - Bibliografija uz svaki rad.

ISBN 978-86-85535-16-1

a) Энергетски извори - Одрживи развој - Зборници

COBISS.SR-

## Organizer

Savez mašinskih i elektrotehničkih  
inženjera i tehničara Srbije (SMEITS),  
**Društvo za obnovljive izvore  
električne energije**

## Co-organizer

Institut za arhitekturu i urbanizam Srbije,  
Beograd

Privredna komora Srbije,  
Beograd

## Sponsors

Interplast, Greece

MS Kablovi, Paraćin

## Endorsement

MT-KOMEX, Beograd

Održavanje 11. MKOIEE finansijski je pomoglo  
Ministarstvo nauke, tehnološkog razvoja i inovacija  
Republike Srbije

Република Србија

МИНИСТАРСТВО НАУКЕ,  
ТЕХНОЛОШКОГ РАЗВОЈА И ИНОВАЦИЈА

## **International Scientific Committee**

Prof. Dr. Mohamed Salah **Aggoun**, Algeria  
Prof. Dr. Slađana **Alagić**, Serbia  
Dr. Ana **Alil**, Serbia  
Assist. Prof. Dr. Marina **Aškrabić**, Serbia  
Dr. Valentin **Birdeanu**, Romania  
Prof. dr Gordana **Broćeta**, Bosnia and Herzegovina  
Prof. Dr. Oleksandr **Bondarenko**, Ukraine  
Dr **Aleksandar Devečerski**, Serbia  
Dr. Silvana **Dimitrijević**, Serbia  
Dr. Stevan **Dimitrijević**, Serbia  
Dr. Nataša **Đorđević**, Serbia  
Prof. Dr. Mirko **Gojić**, Croatia  
Dr. Miroslav **Ignjatović**, Serbia  
Dr. Aleksandar **Ivančić**, Spain  
Prof. Dr. Revathi **Karunanithi**, India  
Prof. Dr. Borut **Kosec**, Slovenia  
Prof. Dr. Zoran **Lazarević**, Serbia  
Dr Filip **Ljubinković**, Portugal  
Prof. Dr. Nikolay **Mihaylov**, Bulgaria  
Dr. Marina **Nenković-Riznić**, Serbia  
Dr. Jovana **Perendija**, Serbia  
Dr. Sanja **Petronić**, Serbia  
Prof. Dr. Olena **Ponomaryova**, Ukraine  
Dr. Mila **Pucar**, Serbia  
Prof. Dr. Nikola **Rajaković**, Serbia  
Prof. Dr. Ivan **Rajšl**, Croatia  
Prof. Dr. Aleksandar **Savić**, Serbia  
Prof. Dr. Zoran **Stević**, Serbia  
Prof. Dr. Valeriy **Sytnikov**, Ukraine  
Prof. Dr. Dejan **Tanikić**, Serbia  
Prof. Dr. Dragan **Tasić**, Serbia  
Prof. Dr. Kong Fah **Tee**, Saudi Arabia  
Dr. Nataša **Tomić**, United Arab Emirates  
Dr. Milica **Vlahović**, Serbia (president)

## **Organizing Committee**

Borjan **Brankov**  
Vladan **Galebović**  
Dr Stevan **Dimitrijević**  
Dr Sanja **Petronić**  
Dr Mila **Pucar**  
Ilija **Radovanović**  
Assoc. Prof. Dr Aleksandar **Savić** (predsednik)  
Prof. dr Zoran **Stević**  
Žarko **Ševaljević**  
Dr Milica **Vlahović**  
Milica **Živanović**

## FOREWORD

*The conditions created by the development of technologies in which modern man lives have led to a complex and paradoxical effect: that by removing obstacles on the way to a more comfortable, simpler, faster and more efficient life and way of working, man also generates numerous misfortunes, attracting dark clouds of threats to the survival of the planet and humanity. The question that concerns and affects all of us - all people, all living beings, systems in which life takes place, large and small, strong and weak - boils down to the problem of the negative impact of man on the environment; this issue invites us to an urgent solution by looking at the causes, proposing solutions, evaluating them, changing approaches and ways of thinking, as well as drawing correct conclusions. Simply put, by adapting nature to one's own needs, man threatens and damages it. That is why, with the joint efforts of all of us, individuals, organizations and states, it is necessary to take all possible measures to immediately prevent the negative effects that are ahead of us.*

*The importance of renewable sources of electricity, which this international conference focuses on, is noticeable from two angles: the first - it is certain that fossil fuels as a resource will disappear and it is necessary to find alternative sources, the second - the use of renewable energy sources by its essence implies "clean" technology that significantly contributes to reducing CO<sub>2</sub> emissions and thus mitigating climate change and reducing pollution, while encouraging social and economic development in all spheres of life.*

*The 11th International Conference on Renewable Electrical Power Sources is organized by the Society for Renewable Electrical Power Sources (DOIEE) at SMEITS, with co-organizers: The Institute of Architecture and Urban & Spatial Planning of Serbia (IAUS) and the Chamber of Commerce and Industry of Serbia, with the support of the Ministry of Science, Technological Development and Innovation of the Republic of Serbia.*

*The registered participants designed their papers according to the given conference topics:*

- Energy sources and energy storage;*
- Energy efficiency in the context of use of renewable energy sources (RES);*
- Environment, sustainability and policy;*
- Applications and services.*

*Eminent authors - scientists, teachers, experts in this field from fifteen different countries: Algeria, Belgium, Bosnia and Herzegovina, China, Croatia, Greece, Hungary, India, Portugal, Saudi Arabia, Serbia, Slovenia, Spain, the United Arab Emirates, and Ukraine, contributed to the conference through sixty-nine papers that were reviewed by the Scientific Committee of the Conference, and after the review process were accepted for presentation at the conference and for publication in the proceedings.*

*At the end of this short message and at the beginning of the proceedings I believe that it can be proudly said that scientists, researchers, policy makers and industry experts gathered in one place, in order to exchange experiences and knowledge with the aim of promoting scientific and professional ideas and results of research, technology improvement for the use of RES, promoting the rational use of electricity, affirming and proposing inventive solutions in the field of sustainable sources of electricity.*

*Belgrade,  
November 2023*

*Milica Vlahović*

# SADRŽAJ / CONTENTS

## Plenarna predavanja:

- 1. IZAZOVI U ELEKTROHEMIJSKOM SKLADIŠTENJU**  
ENERGIJE CHALLENGES IN THE ELECTROCHEMICAL ENERGY STORAGE  
Branimir N. GRGUR..... 1
- 2. POLIANILIN: PROVODNI POLIMER U UREĐAJIMA ZA SKLADIŠTENJE ENERGIJE**  
POLYANILINE: CONDUCTIVE POLYMER IN ENERGY STORAGE SYSTEMS  
Aleksandra JANOSEVIC LEZAIC ..... 11
- 3. ISPITIVANJE KVALITETA EKSPLOZIVNO ZAVARENOG SPOJA RAZNORODNIH METALA ZA POTENCIJALNU PRIMENU U OBNOVLJIVIM IZVORIMA ENERGIJE**  
TESTING THE QUALITY OF EXPLOSIVELY WELDED JOINTS OF DISSIMILAR METALS POTENTIALLY APPLICABLE IN RENEWABLE ENERGY SOURCES  
Ana ALIL, Milos LAZAREVIC, Danica BAJIC, Nada ILIC, Tihomir KOVACEVIC, Bogdan NEDIC..... 23
- 4. METODE BEZ RAZARANJA I UNAPREĐENJE POUZDANOSTI RADA KULE ZA HLAĐENJE, KAO ASPEKT TEMATIZACIJE OBNOVLJIVIH IZVORA ENERGIJE**  
NON-DESTRUCTIVE METHODS AND IMPROVEMENT OF THE COOLING TOWER OPERATION RELIABILITY, AS AN ASPECT OF RENEWABLE ENERGY SOURCES THEMATIZATION  
Marko JARIC, Sanja PETRONIC, Nikola BUDIMIR, Zoran STEVIC, Suzana POLIC..... 35

## Energetski izvori i skladištenje energije:

- 1. ELEKTRIČNA SVOJSTVA TANKIH FILMOVA GO I GO/WPA NA INTERDIGITALNIM ELEKTRODAMA**  
ELECTRICAL PROPERTIES OF GO AND GO/WPA THIN FILMS ON INTERDIGITAL ELECTRODES  
Zeljko MRAVIK, Milica PEJCIC, Sonja JOVANOVIC, Darija PETKOVIC, Misa STEVIC, Zoran STEVIC, Zoran JOVANOVIC..... 45
- 2. MODELOVANJE I SIMULACIJA UREĐAJA ZA NAVODNJAVANJE KAP-PO-KAP**  
MODELING AND SIMULATION OF A DEVICE APPLIED FOR LOW-FLOW DRIP IRRIGATION  
Nouredine BENSEDIRA, Abdessmad MILLES, Mohammed-Salah AGGOUNE ..... 53
- 3. UTICAJ SENKE USLED DENIVELACIJE KROVA NA PROIZVODNJU KROVNE SOLARNE ELEKTRANE IZLAZNE SNAGE 400KW**  
THE INFLUENCE OF THE SHADOW CAUSED BY THE SLOPE OF THE ROOF ON THE PRODUCTION OF A ROOF-TOP SOLAR POWER PLANT WITH AN OUTPUT POWER OF 400KW  
Marko S. DJUROVIC, Zeljko V. DESPOTOVIC ..... 61

<b>4. PROJEKTOVANJE I IZVOĐENJE SOLARNE ELEKTRANE IZLAZNE SNAGE 400KW NA KROVU FABRIČKE HALE "EP BELT"-LOZNICA</b>	
DESIGN AND REALISATION PV ROOF-TOP POWER PLANT 400KW IN THE FACTORY "EP BELT"-LOZNICA	
Zeljko V. DESPOTOVIC, Marko S. DJUROVIC .....	<b>67</b>
<b>5. PRENAMENA NAPUŠTENIH ILI STARIH NAFTNIH POLJA ZA IZGRADNJU GEOTERMALNIH ELEKTRANA</b>	
THE CONVERSION OF ABANDONED OR MATURE OIL FIELDS INTO GEOTHERMAL POWER PLANT LOCATIONS	
Ivan RAJSL, Sara RAOS .....	<b>79</b>
<b>6. POBOLJŠANJE SPOSOBNOSTI SAMOIZLEČIVANJA I ŽILAVOSTI MIKROKAPSULA SA TUNG ULJEM DODATKOM GRAFENSKIH NANOPLOCICA I NJIHOVA PRIMENA U EPOKSI SISTEMU</b>	
THE IMPROVEMENT OF SELF-HEALING CAPABILITY AND TOUGHNESS OF MICROCAPSULES WITH TUNG OIL BY THE ADDITION OF GRAPHENE NANOPATELETS AND THEIR APPLICATIONS IN EPOXY SYSTEM	
Natasa TOMIC, Abdullah MUSTAPHA, Maitha ALMHEIRI, Mohamed Nasr SALEH .....	<b>87</b>
<b>7. MODEL SOLARNOG PANELA SA SOLARNIM TRAGAČEM, UPRAVLJAN POMOĆU ARDUINO UNO MODULA</b>	
MODEL OF THE SOLAR PANEL WITH SOLAR TRACKER CONTROLLED BY THE ARDUINO UNO BOARD	
Ivan TODORIC, Djordje DIHOVICNI, Dragan KRECULJ, Sanja JEVTIC, Nada RATKOVIC KOVACEVIC .....	<b>93</b>
<b>8. TERMoeLEKTRIČNI EFEKAT KAO IZVOR ENERGIJE U PRUŽNIM ŽELEZNIČKIM APLIKACIJAMA</b>	
THERMOELECTRIC EFFECT AS A SOURCE OF ENERGY IN RAILWAY TRACKSIDE APPLICATIONS	
Sanja JEVTIC, Milesa SREČKOVIĆ, Dragan KRECULJ, Nada RATKOVIĆ KOVACEVIC.....	<b>101</b>
<b>9. POREĐENJE RAZNOVRSNIH TIPOVA ENERGIJE OD POKRETNIH VODA</b>	
COMPARISON OF VARIOUS TYPES OF ENERGY FROM MOVING WATERS	
Djordje DIHOVICNI, Dragan KRECULJ, Olga JAKSIC, Nada RATKOVIC KOVACEVIC .....	<b>107</b>
<b>10. ISPITIVANJE LIF/B SISTEMA KORIŠĆENJEM NEGATIVNOG MODA LDI MS: MOGUĆI SISTEM ZA SKLADIŠTENJE VODONIKA</b>	
INVESTIGATION OF LIF/B SYSTEM USING THE NEGATIVE MODE LDI MS: A POSSIBLE HYDROGEN STORAGE SYSTEM	
Filip VELJKOVIC, Bojan JANKOVIC, Ivana STAJCIC, Milovan STOJILJKOVIC, Marija JANKOVIC, Djordje KAPURAN, Suzana VELICKOVIC .....	<b>115</b>
<b>11. UŠTEDA ENERGIJE PRILIKOM ELEKTROLITIČKOG DOBIJANJA VODONIKA-POREĐENJE DVOKOMPONENTNIH I TROKOMPONENTNIH JONSKIH AKTIVATORA</b>	
ENERGY SAVINGS IN ELECTROLYTIC HYDROGEN PRODUCTION – COMPARISON OF BINARY AND TERNARY ACTIVATORS	
Sladjana MASLOVARA, Dragana VASIC ANICIJEVIC, Snezana BRKOVIC, Vladimir NIKOLIC, Milica MARCETA.....	<b>119</b>

<b>12. KINETIKA TERMALNE DEGRADACIJE LIGNOCELULOZNOG OTPADA NA BAZI KOŠTICA BRESKVE</b> THERMAL DEGRADATION KINETICS OF LIGNOCELLULOSIC PEACH STONE WASTE Zorica LOPIČIĆ, Anja ANTANASKOVIĆ, Slobodan CVETKOVIC, Vladimir ADAMOVIĆ, Tatjana SOSTARIC, Jelena AVDALOVIC, Mirjana KIJEVCANIN .....	<b>125</b>
<b>13. THERMAL PROPERTIES OF RAPIDLY SOLIDIFIED Cu-Al-Ni-Mn SHAPE MEMORY ALLOY</b> <b>Borut KOSEC</b> , Milan BIZJAK, Mirko GOJIC, Ales NAGODE, Ivana IVANIC, Blaž KARPE .....	<b>133</b>
<b>14. PROCENA POTENCIJALA POLJOPRIVREDNO-FOTONAPONSKIH SISTEMA U SRBIJI</b> ASSESSMENT OF THE AGRIVOLTAIC POTENTIAL IN SERBIA Aleksandar IVANCIC, Melita ROGELJ, Bora OBRADOVIC, Slaviša JELISIC.....	<b>139</b>

### Energetska efikasnost u kontekstu primene RES:

<b>1. ULOGA KUPCA-PROIZVOĐAČA (PROZJUMERA) U PRIMENI OIEE</b> <b>U SRBIJI: PRE-PREKE I MOGUĆNOSTI</b> THE ROLE OF THE BUYER-PRODUCER (PROSUMER) IN THE IMPLEMENTATION OF RES IN SERBIA: OBSTACLES AND OPPORTUNITIES Marina NENKOVIC-RIZNIC, Borjan BRANKOV, Mila PUCAR, Ana STANOJEVIC.....	<b>147</b>
<b>2. PRIMENA SERIJSKE VEZE KOMPONENTI FREKVENTNO ZAVISNIH KOMPONENTI ISTOG</b> <b>TIPA U SISTEMIMA SA OBNOVLJIVIM IZVORIMA ENERGIJE</b> APPLICATION OF A SERIES CONNECTION OF THE SAME TYPE BANDPASS FREQUENCY DEPENDENT COMPONENTS IN SYSTEMS WITH RENEWABLE ENERGY SOURCES Tykhon SYTNIKOV, Igor PEREKRESTOV, Andrey CHMELECKSKY, Pavlo STUPEN, Valerii SYTNIKOV.....	<b>159</b>
<b>3. SMANJENJE GUBITAKA U DISTRIBUTIVNOJ MREŽI UVAŽAVAJUĆI NESIGURNOST</b> <b>SNAGE OPTEREĆENJA I DISTRIBUIRANE PROIZVODNJE IZ OBNOVLJIVIH IZVORA</b> REDUCTION OF LOSSES IN THE DISTRIBUTION NETWORK CONSIDERING THE UNCERTAINTY OF LOAD AND RENEWABLE DISTRIBUTED GENERATION POWER Nikola KRSTIC, Dragan TASIC, Teodora DENIC.....	<b>165</b>
<b>4. TEHNOLOGIJE ZA PRAĆENJE POLJOPRIVREDNIH ZASADA POMOĆU BESPILOTNIH LETILICA</b> TECHNOLOGIES FOR MONITORING AGRICULTURAL CROPS USING UAV Njegos DRAGOVIC, Milovan VUKOVIC, Snezana UROSEVIC .....	<b>173</b>
<b>5. MIKRO STEP ELEKTROMOTORNI POGON KONTROLISAN MIKROKONTROLEROM</b> MICRO STEP ELECTRIC DRIVE CONTROLLED BY MICROCONTROLLER Misa STEVIC, Zoran STEVIC, Predrag STOLIC, Ilija RADOVANOVIC, Dejan ILIC, Zoran JOVANOVIĆ.....	<b>181</b>
<b>6. SMART MATERIJALI I SAVREMENI KONTEKST ZA FUNKCIONALIZACIJU OBNOVLJIVIH</b> <b>IZVORA ENERGIJE U GALERIJSKOM PROSTORU</b> SMART MATERIALS AND CONTEMPORARY CONTEXT FOR THE FUNCTIONALIZATION OF RENEWABLE ENERGY SOURCES IN THE GALLERY SPACE Suzana POLIC, Sanja PETRONIC, Marko JARIC.....	<b>185</b>

<b>7. BLOCKCHAIN I RANE VIZUELIZACIJE KORIŠĆENJA ENERGIJE VETRA U MUZEJSKIM KOLEKCIJAMA</b>	
BLOCKCHAIN AND EARLY VISUALIZATION OF THE USE OF WIND ENERGY IN MUSEUMS COLLECTIONS	
Suzana POLIC .....	<b>195</b>
<b>8. ENERGETSKA EFIKASNOST U ELEKTRIČNIM VOZILIMA – PREGLED</b>	
ENERGY EFFICIENCY IN ELECTRIC VEHICLES – AN OVERVIEW	
Zoran STEVIC, Ilija RADOVANOVIĆ, Predrag STOLIC, Sanja PETRONIC, Marko JARIC, Misa STEVIC, Dejan ILIC.....	<b>203</b>
<b>9. TOPOLOGIJE NEIZOLOVANIH DC-DC KONVERTORA SA POBOLJŠANIM KARAKTERISTIKAMA</b>	
NON-ISOLATED DC-DC CONVERTERS TOPOLOGIES WITH IMPROVED CHARACTERISTICS	
Oleksii YAMA, Zoran STEVIC, Oleksandr BONDARENKO .....	<b>209</b>
<b>10. MOGUĆNOST PRIMENE ULTRAZVUČNE KAVITACIJE U PROCESU PRERADE INDUSTRIJSKIH OTPADNIH VODA</b>	
POSSIBILITY OF USING ULTRASONIC CAVITATION IN THE PROCESS OF INDUSTRIAL WASTEWATER TREATMENT	
Sladjana JEZDIMIROVIC, Marina DOJCINOVIĆ .....	<b>219</b>
<b>11. ZNAČAJ DISTRIBUCIJE TOPLOTE U SAVREMENIM ENERGETSKI EFIKASNIM ELEKTRIČNIM VOZILIMA</b>	
IMPORTANCE OF HEAT DISTRIBUTION IN MODERN ENERGY EFFICIENT ELECTRICAL VEHICLES	
Zoran STEVIC, Borivoje BEGENISIC, Dušan MURGASKI, Luka STAJIC, Sanja PETRONIC, Ilija RADOVANOVIĆ, Suzana POLIC .....	<b>227</b>
<b>12. PRIMERI PRIMENE VIŠEKRITERIJUMSKOG ODLUČIVANJA U OBLASTI OBNOVLJIVIH IZVORA ENERGIJE</b>	
EXAMPLES OF THE APPLICATION OF MULTI-CRITERIA DECISION-MAKING IN THE FIELD OF RENEWABLE ENERGY SOURCES	
Zoran STIRBANOVIĆ, Dragiša STANUJKIĆ, Jovica SOKOLOVIĆ.....	<b>233</b>

### **Životna sredina, održivost i politika:**

<b>1. RAZMATRANJE PRISUSTVA FENANTRENA U OPŠTINI BOR NA BAZI NJEGOVOG SADRŽAJA U LIŠĆU I STABLJKAMA HEDERA HELIX L.</b>	
A CONSIDERATION OF PHENANTHRENE PRESENCE IN BOR'S MUNICIPALITY BASED ON ITS CONTENT IN LEAVES AND STEMS OF HEDERA HELIX L.	
Aleksandra D. PAPLUDIS, Slađana C. ALAGIC, Snezana M. MILIC, Jelena S. NIKOLIC, Dragana V. MEDIĆ, Zoran M. STEVIC, Vesna P. STANKOV JOVANOVIĆ.....	<b>239</b>
<b>2. PERSPEKTIVE GRADSKOG VAZDUŠNOG SAOBRAĆAJA U BEOGRADU, SRBIJA</b>	
PROSPECTS OF URBAN AIR MOBILITY IN BELGRADE, SERBIA	
Jelena SVORCAN, Djordje CANTRAK, Jelena ANDRIC, Andrea IANIRO.....	<b>245</b>

<b>3. ULOGA SINERGIJE RUDARSKIH I RAČUNARSKIH TEHNOLOGIJA U PROCESU TRANZICIJE KA OBNOVLJIVIM IZVORIMA ELEKTRIČNE ENERGIJE</b>	
THE ROLE OF THE SYNERGY OF MINING AND COMPUTER TECHNOLOGIES IN THE PROCESS OF TRANSITION TO RENEWABLE ELECTRICAL POWER SOURCES	
Predrag STOLIC, Ilija RADOVANOVIĆ, Zoran STEVIĆ, Dejan PETROVIĆ.....	<b>253</b>
<b>4. ODRŽIVOST REŠENJA ZASNOVANIH NA OBNOVLJIVIM IZVORIMA ELEKTRIČNE ENERGIJE – INFORMATIČKI PRISTUP</b>	
SUSTAINABILITY OF SOLUTIONS BASED ON RENEWABLE SOURCES OF ELECTRICITY - ICT APPROACH	
Predrag STOLIC, Ilija RADOVANOVIĆ, Zoran STEVIĆ .....	<b>261</b>
<b>5. CHATGPT, MATERIJALI I OBNOVLJIVI IZVORI ENERGIJE: JEDAN NEELABORIRANI PROSTOR</b>	
CHATGPT, MATERIALS AND RENEWABLE ENERGY SOURCES: ONE UNREALIZED SPACE	
Suzana POLIĆ, Sanja PETRONIĆ, Marko JARIĆ.....	<b>269</b>
<b>6. ANALIZA STRUKTURE OŠTEĆENJA GRAĐEVINSKIH KONSTRUKCIJA NA OSNOVU ODREĐIVANJA FRAKCIONOG SASTAVA OSTATAKA</b>	
ANALYSIS OF THE STRUCTURE OF BUILDING STRUCTURE FAILURES BASED ON THE DETERMINATION OF THE FRACTIONAL COMPOSITION OF DEBRIS	
Valeriia CHORNA, Elena PONOMARYOVA, Sergey SHATOV, Liliia DRUZHININA.....	<b>279</b>
<b>7. UTICAJ EFEKTA STAKLENE BAŠTE NA KLIMATSKE PROMENE</b>	
THE INFLUENCE OF THE GLASS GARDEN EFFECT ON CLIMATE CHANGES	
Sladjana JEZDIMIROVIĆ, Marina DOJCINOVIĆ .....	<b>287</b>
<b>8. PRIMENA TEHNOLOGIJE 3D ŠTAMPE BETONA U REPUBLICI SRBIJI</b>	
APPLICATION OF 3D CONCRETE PRINTING TECHNOLOGY IN SERBIA	
Stefan Z. MITROVIĆ, Ivan IGNJATOVIĆ.....	<b>295</b>
<b>9. ULOGA VODOPROPUSNIH PROIZVODA U POPLOČAVANJU URBANIH SREDINA U SVETLU ODRŽIVOG KORIŠĆENJA RESURSA</b>	
THE ROLE OF PERMEABLE PRODUCTS IN THE PAVING OF URBAN ENVIRONMENT IN THE LIGHT OF SUSTAINABLE USE OF RESOURCES	
Marina ASKRABIĆ, Aleksandar RADEVIĆ, Aleksandar SAVIĆ .....	<b>301</b>
<b>10. OTPADNO STAKLO KATODNIH CEVI U PRIPREMI BETONA – POVEĆAVANJE ODRŽIVOSTI</b>	
CATHODE RAY TUBE WASTE GLASS IN CONCRETE PREPARATION – INCREASING SUSTAINABILITY	
Ivana JELIĆ, Aleksandar SAVIĆ, Tatjana MILJOJČIĆ, Marija SLJIVIĆ-IVANOVIĆ, Marija JANKOVIĆ, Slavko DIMOVIĆ, Dimitrije ZAKIĆ, Dragi ANTONIJEVIĆ .....	<b>309</b>
<b>11. DOPRINOS STUDIJI VEGETACIJSKOG POKRIVAČA: STUDIJA SLUČAJA ZELENIH POVRŠINA U GRADU HRAOUA (ALŽIR)</b>	
CONTRIBUTION TO THE STUDY OF VEGETATION COVER: A CASE STUDY OF GREEN SPACES IN THE CITY OF HRAOUA (ALGERIA)	
Mostafia BOUGHALEM .....	<b>317</b>

<b>12. TRANZICIJA KA OBNOVLJIVIM IZVORIMA ENERGIJE, DEKARBONIZACIJA I PROMENE U ENERGETSKOM SEKTORU KOJE UTIČU NA RADNIKE U TRADICIONALNIM INDUSTRIJAMA</b> TRANSITION TO RENEWABLE ENERGY SOURCES, DECARBONIZATION, AND CHANGES IN THE ENERGY SECTOR AFFECTING WORKERS IN TRADITIONAL INDUSTRIES Miloš CURCIC .....	<b>323</b>
--	------------

### **Aplikacije:**

<b>1. IMPLEMENTACIJA SOLARNE ELEKTRANE SNAGE 200 KWP NA RAVNOM KROVU U PARAĆINU</b> IMPLEMENTATION OF 200 KWP SOLAR POWER PLANT ON A FLAT ROOF IN PARAĆIN Bosko IVANKOVIC, Zoran LAZAREVIC, Ilija RADOVANOVIC, Misa STEVIC, Predrag STOLIC, Dejan ILIĆ, Zoran STEVIC .....	<b>329</b>
<b>2. FIZIČKO-HEMIJSKA KARAKTERIZACIJA ŠTAMPANIH PLOČA</b> PHYSICO-CHEMICAL CHARACTERIZATION OF PCBs Silvana B. DIMITRIJEVIC, Aleksandra T. IVANOVIC, Srdjana MAGDALINOVIC, Stefan S. DJORDIJEVSKI, Stevan P. DIMITRIJEVIC .....	<b>333</b>
<b>3. DEALLOYING PDNI5 LEGURE U 0.5M SULFATNOJ KISELINI</b> DEALLOYING OF PDNI5 ALLOY IN 0.5M SULFURIC ACID Stevan P. DIMITRIJEVIC, Silvana B. DIMITRIJEVIC, Aleksandra T. IVANOVIC, Renata KOVACEVIC .....	<b>341</b>
<b>4. SAGOREVANJE OTPADNOG TERMOBARIČNOG EKSPLOZIVA POD KONTROLISANIM USLOVIMA KAO IZVOR ENERGIJE</b> COMBUSTION OF WASTE THERMOBARIC EXPLOSIVE UNDER CONTROLLED CONDITIONS AS A SOURCE OF ENERGY Danica BAJIC, Mirjana KRSTOVIC, Mladen TIMOTIJEVIC, Bojana FIDANOVSKI .....	<b>351</b>
<b>5. INTERAKCIJE LASERA OD INTERESA ZA MATERIJALE U SISTEMIMA I KOMPONENTAMA U TRANSFORMACIJI ENERGIJE U LINEARNOM I NELINEARNOM OPSEGU</b> LASER INTERACTION OF INTEREST FOR MATERIALS IN SYSTEMS AND COMPONENTS IN ENERGY TRANSFORMATION IN LINEAR AND NONLINEAR RANGES Milesa SRECKOVIC, Aleksandar BUGARINOVIC, Milanka PECANAC, Zoran KARASTOJKOVIC, Milovan JANIĆIJEVIC, Aleksander KOVACEVIC, Stanko OSTOJIC, Nenad IVANOVIC .....	<b>359</b>
<b>6. DETEKCIJA MELASE LAŽNIH DATULA INFRACRVENOM SPEKTROSKOPIJOM PRIMENOM HIJERARHIJSKE KLASIFIKACIJE</b> DETECTION OF DATE MOLASSES ADULTERATED BY INFRARED SPECTROSCOPY USING ASCENDING HIERARCHICAL CLASSIFICATION Samir CHERIGUI, Ilyes CHIKHI, Hadj FAYÇAL DERGAL, Ferial CHELLALI, Hanane CHAKER .....	<b>369</b>
<b>7. DETEKCIJA FALSIFIKOVANJA MELASE GROŽĐA FIZIKO-HEMIJSKIM PARAMETRIMA</b> DETECTION OF ADULTERATION OF GRAPE MOLASSES BY PHYSICOCHEMICAL PARAMETERS Samir CHERIGUI, Ilyes CHIKHI, Hadj FAYÇAL DERGAL, Ferial CHELLALI, Hanane CHAKER .....	<b>373</b>

<b>8. SENZOR SALINITETA ZASNOVAN NA HEKSAGONALNOM FOTONOM KRISTALNOM VLAKNU</b> SALINITY SENSOR BASED ON A HEXAGONAL PHOTONIC CRYSTAL FIBER Ilhem MIREB, Hicham CHIKH-BLED.....	<b>377</b>
<b>9. NAPREDAK U FOTONSKIM KRISTALNIM VLAKNAMA: METODE PROIZVODNJE I PRIMENA ŠIROKOG SPEKTRA</b> ADVANCEMENTS IN PHOTONIC CRYSTAL FIBER: FABRICATION METHODS AND BROAD-SPECTRUM APPLICATIONS Mohammed DEBBAL, Hicham CHIKH-BLED, Mouweffeq BOUREGAA, Mohammed CHAMSE EDDINE OUADAH .....	<b>385</b>
<b>10. ENERGETSKA EFIKASNOST PREDIZOLOVANIH PLASTICNIH CEVI</b> ENERGY EFFICIENCIES OF PRE-INSULATING PLASTIC PIPES Vasilis ZOUDIS.....	<b>393</b>
<b>11. STATISTIČKO MODELOVANJE NEKIH EKOLOŠKI PRIHVATLJIVIH LEGURA NA BAZI BAKRA</b> STATISTICAL MODELING OF SOME ENVIRONMENTALLY-FRIENDLY COPPER-BASED ALLOYS Aleksandra T. IVANOVIC, Silvana B. DIMITRIJEVIC, Stevan P. DIMITRIJEVIC, Branka B. PETKOVIC.....	<b>403</b>
<b>12. SPEKTROSKOPSKA ANALIZA NATRIJUM KARBONATA</b> SPECTROSCOPY ANALYSIS OF ACTIVATED SODIUM CARBONATE Natasa DJORDJEVIC, Milica VLAHOVIC, Slavica MIHAJLOVIC, Nenad VUSOVIC, Srdjan MATIJASEVIC .....	<b>409</b>
<b>13. ANALIZA PERFORMANSI KRUŽNOG FOTONSKOG KRISTALNOG VLAKNA ZA TERAHERC APLIKACIJE</b> PERFORMANCE ANALYSIS OF CIRCULAR PHOTONIC CRYSTAL FIBER FOR TERAHERTZ APPLICATIONS Mohammed CHAMSE EDDINE OUADAH, Mohammed DEBBAL, Assia AHLEM HARRAT, Hicham CHIKH-BLED, Mouweffeq BOUREGAA .....	<b>415</b>
<b>14. POSTUPAK IZRADE POLIMERNOG KALUPA ZA ISPITIVANJE NA ISTEZANJE BIOKOMPOZITNIH MATERIJALA</b> POLYMER MOULD MANUFACTURING FOR TENSILE TESTING OF BIOCOMPOSITE MATERIALS Marija BALTIC, Milica IVANOVIC, Igor STAMENKOVIC, Miloš VORKAPIC, Aleksandar SIMONOVIC .....	<b>421</b>
<b>15. HABANJE Ti-6Al-4V NANOKOMPOZITA SA DISPERGOVANIM ZrO<sub>2</sub> DOBIJENOG MEHANIČKIM LEGIRANJEM I SPARK PLAZMA SINTEROVANJEM</b> WEAR BEHAVIOR OF ZrO <sub>2</sub> DISPERSED Ti-6Al-4V ALLOY NANOCOMPOSITES PREPARED BY MECHANICAL ALLOYING AND SPARK PLASMA SINTERING R. KARUNANITHI, M. PRASHANTH, M. KAMARAJ, S. SIVASANKARAN .....	<b>427</b>
<b>16. PROIZVODNJA NISKOLEGIRANOG Cr-Mo-Ni ČELIKA U ELEKTROLUČNOJ PEĆI</b> PRODUCTION OF LOW ALLOY Cr-Mo-Ni STEEL IN ELECTRIC ARC FURNACE M. GOJIC, M. DUNDJER, S. KOZUH, I. IVANIC, D. DUMENCIC .....	<b>435</b>
<b>17. NUMERIČKA SIMULACIJA I DIZAJN SPOJNICA OD FOTONSKIH KRISTALNIH VLAKNA ZA SEPARACIJU TALASNIH DUŽINA</b> NUMERICAL SIMULATION AND DESIGN OF A PHOTONIC CRYSTAL FIBER COUPLER

### *Apstrakt*

*Ovaj rad se bavi istraživanjem i analizom energetske efikasnosti kod električnih vozila. U kontekstu sve veće popularnosti električnih vozila kao održive alternative tradicionalnim vozilima sa unutrašnjim sagorevanjem, postaje ključno razumeti i unaprediti njihovu efikasnost. Razmotreni su faktori koji utiču na efikasnost, uključujući aerodinamičnost, masu vozila, efikasnost električnog pogona i baterije, kao i uticaj eksternih faktora poput rute vožnje i brzine. Zatim su analizirani rezultati istraživanja kako bi se utvrdili ključni faktori koji mogu povećati efikasnost električnih vozila, kao što su optimizacija aerodinamike, smanjenje mase vozila i vraćanje energije kočenja, koji mogu značajno poboljšati energetska efikasnost. Takođe su istraženi i različiti načini optimizacije električnog pogona i baterija kako bi se smanjio gubitak energije tokom vožnje.*

**Ključnereči:** električno vozilo, baterija, energetska efikasnost

### *Abstract*

*This paper deals with research and analysis of energy efficiency in electric vehicles. In the context of the increasing popularity of electric vehicles as a viable alternative to traditional internal combustion vehicles, it becomes crucial to understand and improve their efficiency. Factors affecting efficiency are considered, including aerodynamics, vehicle mass, electric drive and battery efficiency, as well as the influence of external factors such as route driving and speed. The research results were then analyzed in order to determine the key factors that can increase the efficiency of electric vehicles, such as optimizing aerodynamics, reducing vehicle mass and recovering braking energy, which can significantly improve energy efficiency. Different ways of optimizing the electric drive and batteries were also investigated in order to reduce energy loss during driving.*

**Key words:** electrical vehicle, battery, energy efficiency

## 1 Introduction

An important segment in the development of electric vehicles are the possibilities for increasing the energy efficiency of electric vehicles, in terms of saving energy accumulated in the vehicle itself

and increasing the performance range of the car with the given initial resources. Some of the possibilities that should provide such a progress nowadays are: using energy under braking; using waste heat energy; additional supply by solar cells and airflow turbine; improved mechanical energy transmission system; improved cars shell design; increasing of power converters efficiency; special design of electric engines; using supercapacitors, fuel cells and new generation batteries; route selection on the criterion of minimum consumption in real time; parameter monitoring inside and outside of the vehicle and computerized system control with optimization of energy consumption [1,2]. Many cars are designed to use only electricity as motive power, which reduces emissions to zero. The solar roof is a fine example, so the development of city cars is moving towards the prototype of fully solar vehicles. A solar vehicle is an electric vehicle that is powered entirely or substantially by direct solar energy [2,3].

Another concept that has been developing over the years is a kinetic energy recovery system, often known simply as KERS. KERS is an automotive system for recovering a moving vehicle's kinetic energy under braking. The recovered energy is stored in a reservoir (for example a flywheel or a battery or supercapacitor) for later use under acceleration. Electrical systems use a motor-generator incorporated in the car's transmission which converts mechanical energy into electrical energy and vice versa. Once the energy has been harnessed, it is stored in a battery and released when required. The mechanical KERS system utilizes flywheel technology to recover and store a moving vehicle's kinetic energy which is otherwise wasted when the vehicle is decelerated. Compared to the alternative of electrical-battery systems, the mechanical KERS system provides a significantly more compact, efficient, lighter and environmentally-friendly solution. There is one other option available - hydraulic KERS, where braking energy is used to accumulate hydraulic pressure which is then sent to the wheels when required. Development of new components, improved connections and electric engine control algorithms allow increase of efficiency of power converters, therefore electric engine itself, to the maximum theoretical limits. New generation improvements of electric engine system has an impact on price, however investment quickly pays off during operating. Major efforts are invested in the development of high energy density batteries with minimum equivalent serial resistance (ESR). Also, current research show that fuel cells have reached needed performances for commercial use in electric vehicles. Supercapacitors that provide high power density increase the acceleration of vehicle as well as collecting all the energy from instant braking, therefore improvements of the characteristics of power supply are made [1,3-5].

Increasing the energy efficiency of an electric vehicle implies striving to increase the efficiency of each of the key elements of the vehicle (Figure 1) [6].

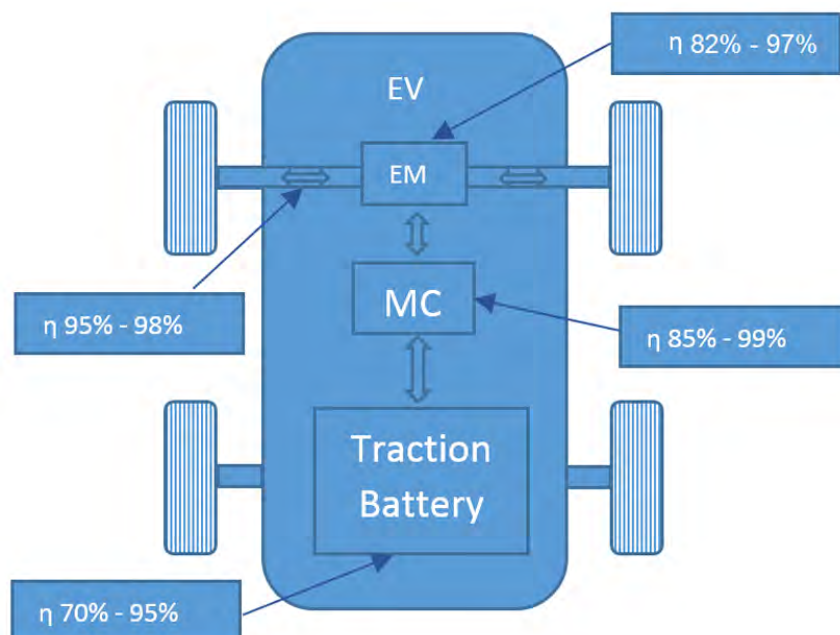

Fig. 1 Energy efficiency of each of the key elements of the EV [6]

Modern electric vehicles have full information system that has constant modifications and does monitoring of inside and outside parameters in order to achieve maximum energy savings. Except for smart sensors, it is highly important to process GPS signals and route selection on the criterion of minimum energy consumption. By combining these technologies, concepts and their improvements, we are slowly going towards energy-efficient vehicles which will greatly simplify our lives in the future [1,7].

## 2 Reduction of electrical losses in EVs

Increasing the energy efficiency of converters can be achieved by optimizing their configuration and control, as well as the selection of adequate components. Converter configuration depends on the type of electric motor, possible regenerative braking energy, drive dynamics, etc. [1].

The main task of electric vehicle development is certainly optimization power supply. In addition to the usual combinations (batteries and supercapacitors), research is moving towards new systems that integrate advantageous characteristics of previously used systems.

Typically, standard supercapacitors can only store about 5% as much energy as lithium-ion batteries. The new hybrid system can store about twice as much as standard ultracapacitors, but this is still much less than standard lithium-ion batteries. However, the advantages supercapacitors are that they can capture and release energy in seconds, providing a lot faster charging times compared to lithium-ion batteries, as well as full utilization of braking energy. In addition, traditional lithium-ion batteries can only be recharged a few hundred times, which is much less than 20,000 cycles which is provided by the hybrid system [1, 8].

A fuel cell electric vehicle (FCEV) has higher efficiency and lower emissions compared with the internal combustion engine vehicles. But, the fuel cell has a slow dynamic response. Therefore, a secondary power source is needed during start up and transient conditions. Supercapacitor can be used as secondary power source. By using supercapacitor as the secondary power source of the FCEV, the performance and efficiency of the overall system can be improved. In this system, there is a boost converter, which steps up the fuel cell voltage, and a bidirectional DC-DC converter, that couples the supercapacitor to the DC bus (Figure2) [1, 8].

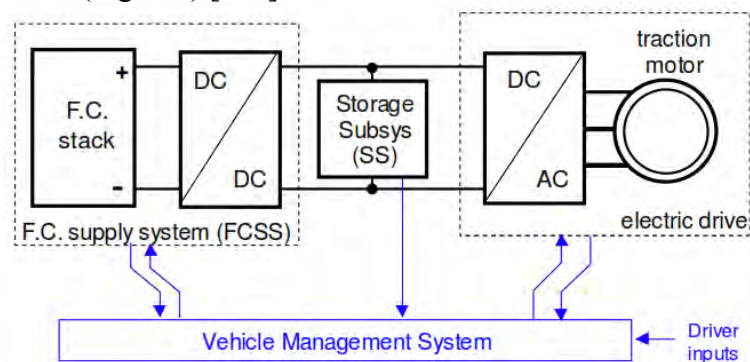

Fig. 2 FCEV with supercapacitor as storage subsystem[8]

## 3 Additional energy in EV

### 3.1 Solar cells

On the small surface area of the car, not enough solar energy can be produced for its movement. So solar panels currently do not great impact on the efficiency of electric cars. The constant development of technology will provide better conditions in the years that they follow.

Today's electric vehicles could, under ideal conditions, generate solar energy to extend their range by about 15%. The surface of the nose of the vehicle, through the hood, all the way to the roof can be used for solar cells as shown in Figure 3. Also, the development of technology will no doubt make progress in increasing the efficiency of solar energy [9].

Fig. 3 EV with solar cells

### 3.2 Energy recovery systems

#### 3.2.1 Kinetic energy recovery system

A kinetic energy recovery system (KERS) is an automotive system for recovering a moving vehicle's kinetic energy under braking. The recovered energy is stored in a reservoir (flywheel or a battery or/and supercapacitor) for later use under acceleration. The device recovers the kinetic energy that is present in the waste heat created by the car's braking process. It stores that energy and converts it into power that can be called upon to boost acceleration, in [1, 10]. KERS technology works like a turbo charger that provides additional power and acceleration by stiffening the tail of the ski in out-turns. The effect: a boost, catapulting the rider into the next turn, just like when Formula 1 pilots push a button for that extra notch of speed. KERS technology is an electronic, fully automatic and integrated system. Electrical energy is immediately released when additional energy is requested. Timing and release are automatically controlled and coordinated [1, 11].

#### 3.2.2 Waste heat energy recovery

In recent years, there has been active research on exhaust gas waste heat energy recovery for automobiles. Meanwhile, the use of solar energy is also proposed to promote on-board renewable energy and hence to improve their fuel economy. New research in thermo electric photovoltaic hybrid energy systems are proposed and implemented for automobiles. The key is to newly develop the power conditioning circuit using maximum power point tracking so that the output power of the proposed hybrid energy system can be maximized. This experimental concept can be easily implemented in electric vehicles (Figure 4) [1, 12].

Fig. 4 Energy recovery [12]

### 3.3 Airflow

The vehicle body can be designed to reduce downforce and otherwise unfavorable air flow, but there is always a large loss of energy, especially at high speeds. Part of the airflow energy can be returned to the system. Some of the possibilities are presented here. During the forward motion of an electric vehicle, air is captured at the front of the vehicle using the channels to one or more turbines with generators for the production of electricity, i.e. it is used to charge the batteries that power the vehicle [1, 13], Figure 5.

*Fig. 5 Airflow energy use [13]*

## 4 Driving optimization

### 4.1 Comfort, information and safety

Today, a computer is an indispensable part of every vehicle. It supervises and controls practically all the functions of the vehicle, but a lot of additional information is processed and displayed, which significantly contributes to comfort and safety. In EV, this trend is especially used, since the vehicle is equipped with sensors that provide input data and further process in the computer. The obtained results act on the actuators, or the state is shown on the display and the decision is left to man [1].

### 4.2 Route optimization

Route optimization (RO) is an important feature of the EV which is responsible for finding optimized paths between any source and destination nodes in the road network. Recent researches perform the RO for EV using the Multi Constrained Optimal Path (MCOP) problem. The proposed MCOP problem aims to minimize the length of the path and meets constraints on total travelling time, total time delay due to signals, total recharging time, and total recharging cost. The proposed algorithms need to have innovative methods for finding the velocity of the particles and updating their positions with accurate database of the requested roads [1].

Relevant research on the application of trip distance distributions data specifically to electric vehicles, and in particular battery charging behavior, can be broadly grouped into two categories, neither of which typically includes quantification of resulting GHG emissions. The first category aims to optimize the technological capability, the charging time or the location of the charging stations, with the aim of improving the penetration of electric vehicles. Multi-day trip data was used to maximize mileage and minimize the number of trip interruptions due to charging. Using GPS trajectory data collected from the taxi fleet, the optimization model was developed and found that charger utilization increased and that the number of chargers at each charging point could be reduced by providing a waiting area [14].

## 5 Conclusion

The paper provides an overview of the situation and presents key points and recommendations for improving the energy efficiency of electric vehicles. The importance of research and development was emphasized in order to achieve the optimal balance between performance, comfort and energy efficiency of electric vehicles. Based on that, future research in this area that will contribute to the global effort for sustainable mobility is indicated.
